PROJECTS

BOOK STORE (MERN APP) [\(GITHUB-LINK\)](#)

- This is a MERN stack application for book enthusiast.
- It retrieves a list of books from a MongoDB database and allows the user to update, delete and add new books.
- Provides User Login and authentication.
- **React Js (Frontend) NodeJs,ExpressJs(Backend) , Mongo(DATABASE).**

CRYPTO CHECKER (DEMO-LINK)(GITHUB-LINK)

- This is an application that displays the **top trending crypto coins** and their prices. The user can **search for any coin** and see a graph representing the changes in the price over time.

USER AUTHENTICATION (BACKEND) [\(GITHUB-LINK\)](#)

- This is an API that provides **email-based authentication** of users by sending and **verifying OTPs** in their mail.
- It uses tokens to verify users and **encryption** techniques to store passwords in the database.
- **NodeJs,ExpressJs,Nodemailer** and **MongoDB** .

PRODUCTIVE-PRO (SCALER HACKATHON PROJECT) [\(DEMO-LINK\)](#) [\(GITHUB-LINK\)](#)

- **Problem Statement:** Building the Ultimate Productivity Tool
- Created a website that consists of a **todo list maker, a pomodoro timer, website blocker chrome extension** and a **YouTube music player**. These features help in minimizing distraction and maximizing productivity.
- **React js ,youtube api ,firebase authentication**

[Other Projects](#)

ACHIEVEMENTS

- Solved **300+ LEETCODE** problems
- Completed **Scaler Open Source Challenge** [\(Certificate Link\)](#)
- Participated in **Hacktoberfest**
